this book consists of a set of nineteen original essays on important recent antitrust cases each essay discusses a single case and was written by economists who actually participated in the case the cases are organized into three major sections horizontal structure horizontal practices and vertical and complementary market issues each section has an introductory overview essay written by the editors in this third edition eleven new cases have been added and eight cases from the second edition have been updated and shortened

the handbook examines the most important issues that arise in antitrust economics leading scholars in the field provide detailed critical analysis of developments across a number of different antitrust topics along with a detailed review of the literature the handbook is invaluable as a research and teaching tool

the antitrust revolution economics competition and policy fifth edition examines the critical role of economic analysis in recent antitrust case decisions and policy the book consists of economic studies of twenty one of the most significant antitrust cases of recent years twelve of them new to this edition and nine updated from the fourth edition these cases include alleged anticompetitive practices by visa and mastercard microsoft and kodak mergers proposed or consummated by staples and office depot pseg and exelon echostar and directv and heinz and beech nut and other competitive issues such as predatory pricing in the airline industry reverse payments in settlements of patent litigation the use of bundled rebates by dominant firms exclusive dealing and retailer instigated restraints on supplier sales new overview essays precede the four sections of the book horizontal structure horizontal practices vertical and related market issues and network issues commissioned and edited by john e kwoka jr and lawrence j white the case studies are written by prominent economists who participated in the proceedings these economists were responsible for helping to formulate the economic issues undertake the necessary research and offer arguments in court as a result they are uniquely qualified to describe and analyze the cases fully updated with the most current examples this volume provides detailed and comprehensive insight into the central role that is now played and will continue to be played by economists in the antitrust process the antitrust revolution fifth edition is ideal for undergraduate and graduate classes in industrial organization government policy and antitrust regulation law and economics it is also a useful reference book for lawyers and economists both academics and practitioners who are interested in the types of economic analyses that have been applied in recent antitrust cases a companion website featuring cases from the previous four editions is available at oup.com/us

antitrustrevolution

american markets once a model for the world are giving up on competition thomas philippon blames the unchecked efforts of corporate lobbyists instead of earning profits by investing and innovating powerful firms use political pressure to secure their advantages the result is less efficient markets leading to higher prices and lower wages

this volume celebrates the life and career of gordon rausser pioneer and leader in natural resource economics while critically overviewing the emerging literature in the field as the chair of the agriculture and resource economics department at uc berkeley rausser led the transformation of the department from a traditional agricultural economics department to a diverse resource economics department addressing issues of agriculture food natural resources environmental economics energy and development this book builds on this theme showcasing not only the scope of rausser s work but also key developments in the field the volume is organized into two parts the first part speaks about the lessons of gordon rausser s career in particular his role as a leader in different spheres his capacity to integrate teaching and entrepreneurship and his impact on the world food system the second part will address some of the significant developments in the field he contributed to and how it relates to his work the chapters include contributions from modern leaders in the economics field and cover diverse topics from many subfields including public policy public finance law econometrics macroeconomics and water resources providing an excellent reference as well as a celebration of a pivotal figure in the field this volume will be useful for practitioners and scholars in agricultural and resource economics especially the many individuals familiar with gordon rausser and his career

this book seeks to investigate platform power in the multi platform era and unravels the evolution of power structures in the tv industry as a result of platformisation multiple tv platforms and modes of distribution are competing not necessarily in a zero sum game to control the market in the volume the contributors work to extend established platform theory to the tv industry which has become increasingly organised as a platform economy the book helps to understand how platform power arises in the industry how it destabilises international relations and how it is used in the global media value chain platform power and policy in transforming television markets contributes to the growing field of media industry studies and draws on scholarly work in communication political economy and public policy whilst providing a deeper insight into the transformation of the tv industry from an economic political and consumer level avoiding a merely legal analysis from a technology driven perspective the book provides a critical analysis of the dominant modes of power within the evolving structures of the global tv value chain

in the late 1990s the european commission embarked on a long process of introducing a more economic approach to eu antitrust law one by one it reviewed its approach to all three pillars of eu antitrust law starting with article 101 tfeu moving on to eu merger control and concluding the process with article 102 tfeu its aim was to make eu antitrust law more compatible with contemporary economic thinking on the basis of an extensive empirical analysis of the commission s main enforcement tools this book establishes the changes that the more economic approach has made to the commission s enforcement practice over the past fifteen years it demonstrates that the more economic approach not only introduced modern economic assessment tools to the commission s analyses but fundamentally changed the commission s interpretation of the law emulating one of the key credos of the us antitrust revolution thirty years earlier the commission reinterpreted the eu antitrust rules as aiming at the enhancement of economic consumer welfare only and amended its understanding of key legal concepts accordingly this book argues that the commission s new understanding of the law has many benefits its key principles are logical translate well into workable legal concepts and promise a great degree of accuracy however it also has a number of serious drawbacks as it stands most worryingly its revised interpretation of the law is to large extents incompatible with the case law of the european court of justice which has not been swayed by the exclusive consumer welfare aim this situation is undesirable from the point of view of legal certainty and the rule of law

competition is recognised as a key driver of growth and innovation competition ensures that businesses continually improve their goods and services whilst striving to reduce their costs anti competitive conduct by businesses such as price fixing causes harm to the economy to other businesses and to consumers it is small businesses and the consumer who ultimately pay the price for anti competitive conduct a coherent competition policy that is both effectively implemented and effectively enforced is essential in driving growth and innovation in a market economy the importance of competition was recently emphasised when the eu ecb imf troika included a number of competition specific conditions to the terms of ireland s bailout both irish and community law recognise the right for parties injured by anti competitive conduct to sue for damages this right to damages in theory allows those that have suffered loss to recover that loss whilst helping to deter others from taking the illegal route to commercial success however private actions for damages in ireland are rare this book asks what the purpose of private competition litigation is and questions why there has been a dearth of this litigation in ireland the author makes a number of suggestions for reform of the law to enable and encourage private competition litigation the author takes as his starting point the european commission s initiative on damages actions for breach of the ec antitrust rules and compares the position in ireland to that currently found in the uk and us

the proliferation of merger control laws in the absence of a mechanism to coordinate the transnational merger review places an unnecessary burden on merging parties and runs the risk of divergent outcomes which at times cause friction among nation states

david j teece has led the way in integrating industrial organisation technological innovation and strategic management this book and its companion volume reveal how he achieved it

mueller discusses the economic challenges faced as a result of events in the latter third of the 20th century the formation of the european union the collapse of communism in east europe and the deregulation and privatization movement that spread from north america to europe
